# Well Puppy and Well Kitten Package

**Get your new  
pet off to a  
good start!**

**Congratulations on your new addition!** We are Anchorage's longest established veterinary practice and want to help you get your new pet off to a good start. There are many diseases and parasites which can cause serious illness and death in puppies and kittens, and our goal is to help your pet avoid these problems with good physical examinations, proper inoculations, and a parasite test. To encourage you to follow through with all the needed inoculations and parasite checks, we offer a "Well Puppy" and "Well Kitten" Package.

## **Kittens:**

Physical examinations given concurrent with vaccines, a feline leukemia test, deworming, a stool test for parasites, and kitten immunizations for the first year (which include Feline Distemper, Rhinotracheitis, Calici Virus, Feline Leukemia and Rabies).

**Package price: \$238**

Average Savings: \$178 or more!

## **Puppies:**

Physical examinations given concurrent with vaccines, deworming, a stool test for parasites, and puppy immunizations for the first year (which include Distemper, Hepatitis, Parainfluenza, Parvo Virus, Corona Virus and Rabies).

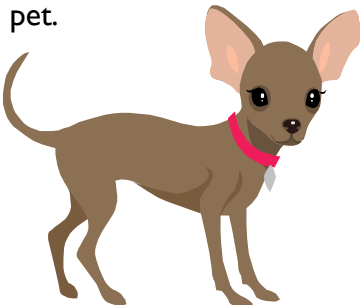

**Package price: \$238**

Average Savings: \$247 or more!

Please feel free to discuss any aspect of your pet's health, feeding, housetraining, etc. with our veterinarians whenever you are in the office for one of the immunization visits.

Also, with the purchase of a Well Puppy or Well Kitten Package we will spay or neuter your pet for half the normal price if done by seven (7) months of age (Please note: The discounted spay or neuter is NOT included in the price of the package. Thank you!)

We now also offer to microchip your puppy or kitten for the reduced price of \$54 when you purchase the package. The microchip has a lifetime registration and all the registration fees are paid by us! It can be done at the time of spay or neuter, or consult your doctor about when is the right time to microchip your young pet.
